As Woody Dorsey explains in Behavioral Trading: Methods for Measuring Investor Confidence, Expectations and Market Trends - "This perpetual error-making process, or inherent participant bias, is the central symptom, but least studied area, of the market. Doesn't it seem logical to try to measure this bias or mood?..."

Behavioral Trading

Set up a time frame where you will measure the behavior (e.g., minutes, hours, days, etc.) Note the time when the first behavior happens. Tally each behavioral tick that occurs until you reach the time frame you originally established. Divide the number of behaviors with the total amount of time to get the frequency.

Amazon.com: Customer reviews: Behavioral Trading: Methods ...

Behavioural Trading is not Behavioural Finance or Trading Psychology. Behavioural Finance looks at the markets and investor behaviour to make sense of what is happening. Trading psychology is an observational assessment of what people engaged in trading are doing from a psychological perspective. Both take a third person perspective.
