## British Railway

### Track Design

Since those early days, the British rail network has grown, contracted, and grown again into an unwieldy behemoth. The 1,400km-long island is served by some 31,091km of track (according to the Rail Infrastructure and Assets 2018-19 Annual Statistical Release) managed by Network Rail for a total route length open to trains of 15,847km.
