Desert Wildlife

Desert Wildlife Although at first glance the desert seems to have little in the way of wildlife, it actually contains large, diverse populations. The desert environment may seem an unlikely place for animals to thrive or even exist. However, desert animals have adapted to their environment, and each fills an important niche in the desert ecosystem.

Desert Wildlife

The desert habitat is home to a variety of animals that have adapted to survive in harsh, dry conditions. Some of the most iconic desert animals have obvious physical characteristics that have enabled them to adapt to their environment. Camels are one of the most noteworthy of the desert dwellers ...

Desert Animals | DesertUSA

Some desert habitats are short-lived—springing up to brighten the landscape only when the rains come. Many desert plants, like cacti in the Americas, are able to absorb and store water, letting them survive long periods of drought. Animals have adapted to get water from the food they eat and to conserve what little they obtain.
