Geography and Economic Development - John Luke Gallup ...

The question why we observe such large income differences between countries is arguably the most important question in economics. Lately, research on this issue has focused on the so-called deep or fundamental determinants of economic development. Three determinants have been singled out, institutions, geography and economic integration (openness).

Economic development and the geography of institutions ...

Statistical research supported by the findings of interviews and focus groups is used to probe these issues. The findings confirm the hypothesis and shed light on both the factors associated with the economic geography of talent and its effects on regional development. The economic geography of talent is highly concentrated.

Africa, China and the 'new' economic geography of development

Economic development, the process whereby simple, low-income national economies are transformed into modern industrial economies. Although the term is sometimes used as a synonym for economic growth, generally it is employed to describe a change in a country's economy involving qualitative as well as quantitative improvements. The theory of economic development—how primitive and poor ...
