The PI OPC DA interface is started using a Windows batch file that invokes the interface executable and specifies settings using command line parameters. To ensure a correctly- formatted batch file, do not edit the batch file manually: use PI ICU. For a complete list of Unilnt startup parameters, refer to the Unilnt Interface User Manual.

I am investigating the possibilities to do manual data entry in PI AF. In this use case, the amount of data that has to be entered is very small (about 5 to 10 tags with a single value on a monthly basis). I was thinking about using PI System Explorer because the users are already familiar with it. However I face one limitation.
