Pascal's wager is an argument in philosophy presented by the seventeenth-century French philosopher, theologian, mathematician and physicist, Blaise Pascal (1623–1662). It posits that humans bet with their lives that God either exists or does not.. Pascal argues that a rational person should live as though God exists and seek to believe in God.

Pascal's wager - Wikipedia

Parts of an Article That are not theory 1. References are not theory. Lots of references to existing theories does not create a new theory. Sometimes references are a smoke screen or are "throw-away" references. Authors need to explain which concepts and arguments are adopted from cited sources and how they are linked to the developed theory. 2 ...

The Bill Gates-coronavirus conspiracy theory, explained

A theory can be true or not true, all we know about a scientific theory is that it has predictive power and hasn't been proven wrong by experiment yet. To understand this logic we will need to cover the scientific method and explain the difference between theory in common language , scientific theory, philosophical truth , and absolute truth ...

A Theory Isn't True Unless Proven True - Fact or Myth?

For example, the luminiferous aether wasn't debunked; it was not needed in the new theories, and so it dropped out of physics, but that's a very different matter. Locke's objection to innate ideas, principles, knowledge, etc., not only wasn't a scientific

theory, but isn't touched by genetic theory, or by any scientific theory.

10 Most Famous Scientific Theories That Were Later Debunked

A theory is underdetermined (also called indeterminacy of data to theory) if a rival, inconsistent theory is at least as consistent with the evidence. Underdetermination is an epistemological issue about the relation of evidence to conclusions. A theory that lacks supporting evidence is generally, more properly, referred to as a hypothesis.

Theory - Wikipedia

Theory definition, a coherent group of tested general propositions, commonly regarded as correct, that can be used as principles of explanation and prediction for a class of phenomena: Einstein's theory of relativity. See more.

This is yet another conjecture that 'might be true', on which there is no consensus in the string theory community. and in a retweet, Will Kinney accurately notes that. The landscape is a conjecture. The "swampland" is a conjecture built on a conjecture.

Theorists with a Swamp, not a Theory | Not Even Wrong

Is innovation inherently a hit-or-miss endeavor? Not if you understand why customers make the choices they do.

Know Your Customers' "Jobs to Be Done"

We are not given any 'theory of everything' that can explain things in terms of evolutionary biology or social forces. Reality and people are complex and at bottom mysterious. (b) Christianity does not claim that if our agenda is followed most of our problems will be fixed. Meta-narratives have a "we are the Saviors" complex.
